# Space Table Lamp

WARD WIJNANT

Is it a mirror? Is it a lamp? Is it a disco? Yes, it's all and more! The Space Table Lamp designed by Ward Wijnant has something truly special to show you. As if from another dimension, it wants to adapt to your environment. During the day, it sits quietly with its mirrored appearance reflecting its surroundings. Then in the dark of the night, it loves to shine its mysterious lights. Make sure to pay close attention, because when it does, its silver surface will become translucent and a new world will appear from within its ostensible mirror.

---
