An almost imperceptible lens covers the LED and distributes the light. If only the cylindrical lamp is used, the downward-directed light is impeccable, and when a shade is added, the light escapes, illuminating the lamp itself.

Milana Counterweight

Milana 32 Counterweight

Milana 47 Counterweight

Moving the point of light, that's the idea behind the new design by Jaime Ramirez. Milana involves a system of modular suspension lamps that combine with one another and can be moved both vertically and horizontally.
